DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: "as" needs inserted before "an" on page 2 at line 28; and "to" needs inserted before "a" on page 3 at line 12.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 7 recites the limitation "the electron gun" in line 1. There is insufficient antecedent basis for this limitation in the claim.
5. I recommend changing claim 7 to depend from claim 3 to overcome the rejection.

Allowable Subject Matter

6. Claims 1-6 and 8-16 are allowed.
7. Claim 7 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
8. The following is a statement of reasons for the indication of allowable subject matter: it is neither anticipated nor obvious over the prior art of record to have a lighting equipment for generating anions to purify air as claimed by Applicant in claim 1. It is also neither anticipated

nor obvious over the prior art of record to have a method of providing air purification using a lighting equipment having a housing engaged with at least one illumination unit as claimed by Applicant in claim 9.

9. US 6,713,026 B2 to Taylor et al. (Taylor) discloses an air purification apparatus and a method for using it. The apparatus does not have an illumination unit engaged with a housing.

10. US 6,464,499 B1 to Lu discloses a sterilizing wastewater treatment method and apparatus for a dental clinic. There is a lamp present. The apparatus does not have an emitting aperture with a plurality of holes for exhausting the generated anions.

11. Combining Taylor and Lu would result in all of Applicant's claimed limitations, but there is no motivation to combine the air purification apparatus and method of Taylor with the wastewater treatment method and apparatus of Lu unless hindsight reasoning is used.
